

GreenPerk

Taking your carbon footprint to zero

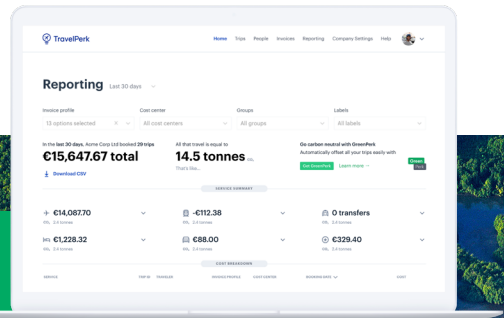

GreenPerk

Reduce your impact

Everyone who does business around the world knows the importance of speaking face-to-face. Technology is constantly making this more convenient for all of us, but there's still no substitute for the connections you make in person.

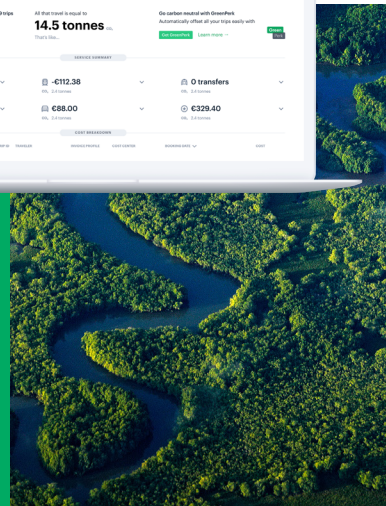

But those connections come at a cost: both for ourselves and the world we live in. Every flight, every car journey, every night in a hotel comes at a carbon cost. And while technology is reducing the impact, the time to act has long passed.

That's why TravelPerk has teamed up with atmosfair to bring you GreenPerk.

Track Everything

Real-time tracking lets you see just how much carbon your travel is emitting and displacing.

Offset Everything

Opt-in to offset 100% of your carbon emissions. TravelPerk calculates the emissions for every trip and automatically charges your account. That money is then put into one of atmosfair's carbon offsetting projects.

atmosfair's sustainability projects are fully certified to the highest standards from bodies like the United Nations—and we'll keep you fully up-to-date with their progress.

atmosfair 

What will it cost?

On average, 4% of a trip's total price will offset 100% of its CO₂.*

*Based on a round-trip flight from London to Barcelona (€170) and two nights in a standard hotel (€250). Offsetting this trip would cost €17.60.

** Cost calculated based on 1 CO₂ tonne = 27 euro. An average trip including a short haul roundtrip flight + 2 nights hotel produces 0.36 tonnes of CO₂.
